

OWS - Main Entrance Gate Lock

The main entrance gate needs to be secured to eliminate the risk of trespassers but also allow access for valid lake users. Therefore, during the session the gate will be locked via a D-Lock with a combination.

To Exit:

1. Use the combination number as shown in your booking confirmation email (hint: total mileage of an Ironman) and remove the end of the D-Lock.
2. Leave the main 'D' part attached to the gate.
3. Release the chain and open the gate.
4. Once through, replace the chain and refit the end of the D-Lock.

Note:

- If in doubt, wait for someone who knows what to do.
- **DO NOT** climb over the gate, this will jeopardise our future access to the Sailing Club.

- Other lake users must still be able to get access by unlocking the padlock on the main chain.
